Weekly Full Time Industrial Training Project Report

Student Roll Number: 02	Student Name: Chaitali Sunit Banmare
Company Name: PeakProsys Solutions	Company Mentor Name: Nitin Kale
College Mentor Name: Prof. Sayli Patil	
Project Title: Good Job Placement	Technology Using: MERN Stack
Work Done During the week (27/04/2026 To 01/05/2026) • Improved Reaction System by restricting users to react only with emojis on posts. • Implemented logic to ensure users can select and display only one reaction per post properly. • Fixed UI issues related to reaction display and synchronization with backend. • Merged all modules (Community, Courses, Vacancies, etc.) into a single unified structure. • Refactored code to maintain consistency and avoid duplication across modules. • Pushed the updated and merged project code to GitHub repository. • Performed testing after merging modules and resolved integration issues.	
Results / Output : • Reaction system is now properly controlled and works smoothly with emoji-only interaction. • Improved UI consistency and correct display of user reactions. • All modules are successfully merged into a single structured application. • Codebase is cleaner and easier to manage after refactoring. • Project is successfully updated and maintained on GitHub. • Application runs smoothly after testing and bug fixes.	
Proposed work for Next Week : • Implement real payment gateway integration to replace the current dummy payment system. • Develop complete payment flow (frontend + backend) including transaction handling. • Test payment functionality with different scenarios to ensure reliability. • Prepare the application for deployment by optimizing code and configurations. • Deploy the project on a hosting platform and perform final testing after deployment.	

Weekly detailed Report of work done:

Date	Task Assigned	Task Completed	Pending Task	Pending Completed
27/04/2026 Monday	Reaction System Improvement	Restricted users to react only with emojis and updated backend logic	UI issues	Completed
28/04/2026 Tuesday	Reaction UI Fix	Fixed reaction display and ensured only one reaction per user	-	Completed
29/04/2026 Wednesday	Module Integration	Merged all modules and ensured proper functionality	Testing	Completed
30/04/2026 Thursday	Code Refactoring & GitHub	Refactored code and pushed updated project to GitHub	-	Completed
01/05/2026 Friday	Holiday (Maharashtra Day)	-	-	-
